Sales Data
Analysis Report

PREPARED BY
Yardan Danz

DISCIPLINE
Data & Insight

DATE
September 2026

An exploration of customer behaviour, product performance, and seasonal patterns to support sharper, evidence-based decisions.

01 — EXECUTIVE SUMMARY

This report analyses twelve months of sales data across four product categories. The objective was to identify the strongest growth drivers and reveal opportunities hidden within the transaction records.

02 — METHODOLOGY

Data was cleaned and normalised before exploratory analysis. Visualisation was used to compare monthly performance, customer segments, and product contribution to total revenue.

03 — KEY FINDINGS

- Revenue grew steadily in Q2 and Q3.
- Two categories contributed over sixty percent of sales.
- Repeat customers showed a noticeably higher basket value.

04 — RECOMMENDATION

Focus retention efforts on high-value repeat customers, simplify the product mix, and monitor seasonal demand through a lightweight monthly dashboard.
